### 4th CIBERDEM Annual Meeting

**Abstract Submission deadline: Wednesday, July 20, 2011**

Abstract Submission is now available online for the 4th CIBERDEM Annual Meeting, to be held in Vall de Boi on October 23-26, 2011. You may enter at [www.annualmeeting.ciberdem.org](http://www.annualmeeting.ciberdem.org) or access this website through a permanent banner on the CIBERDEM website [www.ciberdem.org](http://www.ciberdem.org). Please note that the deadline for sending abstracts is quickly approaching.

**Open call: Propuestas de talleres científicos para Investiga la diabetes'11, 4a jornada de divulgación científica CIBERDEM**

Con el objetivo de fomentar la cultura y las vocaciones científicas y de dar a conocer el estado actual de la investigación en diabetes y las enfermedades metabólicas asociadas, CIBERDEM celebra el próximo 12 de noviembre su 4a jornada de divulgación científica, *Investiga la diabetes'11*, en el Paraninfo de la Universidad del País Vasco (UPV/EHU) en Bilbao. Abierta a todos los públicos, la jornada se inaugurará con una conferencia divulgativa a cargo del Dr. Bernat Soria, seguida de talleres científicos interactivos desarrollados por investigadores CIBERDEM. Desde el 27 de junio y hasta el 7 de septiembre, los grupos de investigación tienen la oportunidad de participar enviando sus propuestas de talleres a Johanna Rivera, [jrivera@ciberdem.org](mailto:jrivera@ciberdem.org), cumplimentando el siguiente formulario: [Talleres jornada 2011](#). ¡Te animamos a participar!

**Technology Transfer offer: Predictive markers of pre-diabetes and type 2 diabetes**

Research at a UK university has yielded the discovery and preclinical development of an optimized, specific immunoassay which functions by quantifying naturally occurring glycated insulin found to be elevated in newly diagnosed diabetics as well as those patients predisposed to developing the disease. The present ELISA for glycated insulin could be optimised for a clinical analyser platform, self monitoring and point of care testing. A Technology Cooperation or License Agreement is sought. They are actively seeking a strategic partner to assist in validation and further development and provide a route to market for using the technology in the detection of pre-diabetes and type II diabetes (it could be a Research group that could contribute to License Agreement, Joint further development, Testing of new applications and Adaptation to specific needs). If you are interested in contacting this institution please do not hesitate to inform Gemma Pascual, [gpascual@ciberdem.org](mailto:gpascual@ciberdem.org).

## **Technology Transfer offer: Novel treatment of Alzheimer's disease utilizing GIP and GLP-1 analogues**

Recently, type 2 diabetes (T2D) has been identified as a risk factor for Alzheimer's Disease (AD) and this is thought to be a result of the desensitization of insulin receptors in the brain. Studies have shown that T2D can be ameliorated by chronic application of incretin analogues and more recently GLP-1 receptor activation has been shown to reverse neuronal insulin receptor desensitization. Ongoing research at a UK university has shown lead GLP-1 and GIP agonists to protect neurons from the effects of beta-amyloid build-up in chronic disease models. These results indicate that these analogues possess utility for the treatment and prophylaxis of AD. The group is actively seeking a strategic partner who have based his experience on Pharmaceutical issues to assist in the further development of the product, thus providing a route to market for the treatment of AD (it could be a Research group that could contribute to License Agreement, Joint further development, Testing of new applications and Adaptation to specific needs). If you are interested in contacting this institution please do not hesitate to inform Gemma Pascual, [gpascual@ciberdem.org](mailto:gpascual@ciberdem.org).

## **Convocatorias**

### **Contrato predoctoral para realizar una tesis en la fisiología del islote de Langerhans y la diabetes**

Unidad de Investigación Básica en Diabetes, UMH | Fecha límite: 29/07/2011 | IP Angel Nadal

[Más información](#)

### **Premios Fundación 3M a la Innovación 2011**

Fundación 3M | Fecha límite: 29/07/2011 | Dotación: 6.000€ en cada una de sus categorías

[Más información](#)

### **Premio Severo Ochoa de Investigación Biomédica**

Fundación Ferrer Investigación | Fecha límite: 31/07/2011 | Dotación: 40.000€

[Más información](#)

### **Individual Marie Curie Actions 2011**

European Commission | Deadline: 11/08/2011 | Budget: IEF-€109.850.000; IOF-€40.000.000; IIF-€40.000.000

Marie Curie Intra-European Fellowships for Career Development (IEF): Action that provides financial support to experienced researchers from any nationality to implement a project in a Member State or Associated Country different than the original one. Duration: 1-2 years.

Marie Curie International Outgoing Fellowships for Career Development (IOF): Call opened to offer financial support for individual projects from experienced researchers who are nationals of Member States or Associated countries in liaison with a host organisation also from a Member State or Associated country for the return phase; the outgoing phase should be made in an organisation located in a Third Country. Duration: Up to 3 years (initial outgoing phase: 1-2 years and a mandatory reintegration phase: 1 year).

Marie Curie International Incoming Fellowship (IIF): Action opened to experienced researchers of any nationality for developing a research project. The researcher must demonstrate mobility from a third country to a host organisation in a Member State or Associated country. Duration: Between 1 and 2 years (with an additional possible return phase).

## **Agenda**

### **47th EASD Annual Meeting**

Lisboa | 12-16/09/2011

## Pere Estupinyà: «El pensamiento científico debería influir en política»

Es importante que el pensamiento científico impregne a la sociedad y llegue incluso a la toma de decisiones políticas. Que influya en la manera de gobernar, en la educación, en la competitividad económica del país.
