Investiga la diabetes'11: jornada de divulgación científica

Con el objetivo de fomentar la cultura y las vocaciones científicas y de dar a conocer a la sociedad el estado actual de la investigación en diabetes y las enfermedades metabólicas asociadas, CIBERDEM celebra el próximo 12 de noviembre su 4a jornada de divulgación científica, *Investiga la diabetes'11*, en el Paraninfo de la Universidad del País Vasco (UPV/EHU) en Bilbao. Abierta a todos los públicos, la jornada se inaugurará con una conferencia a cargo del Dr. Bernat Soria, seguida de talleres científicos desarrollados por investigadores CIBERDEM.

Gracias a...

Gracias a la colaboración de la Asociación de Diabéticos de Madrid, la Dra. Flora de Pablo, Prof. de Investigación del Centro de Investigaciones Biológicas-CSIC e Investigadora Principal CIBERDEM, presentó el pasado 7 de octubre en Madrid la conferencia *Descubre qué hay de nuevo en diabetes*. En el acto también se difundió la iniciativa de fundraising «Investiga la diabetes».

Nueva Plataforma de Citometría al servicio de CIBERDEM

Se ha inaugurado la nueva Plataforma de Citometría de Flujo situada en los servicios de Recursos Científico Técnicos (SRCT) de la Universitat Rovira i Virgili en Tarragona. Se trata de una unidad compuesta por el FACS ARIA III (BD) un sorter de última generación con capacidad para discernir hasta 17 parámetros distintos (FSC, SSC y 15 fluorescencias) gracias a sus 4 láseres (near UV, blue, violet and red). Para más información contactar con Xavier Escoté, xescote@gmail.com

Technology Transfer offer: New algorithm useful for insulindependent diabetic patients before and during exercise

A new developed algorithm will help insulindependent diabetic patients to estimate the amount of supplemental carbohydrates they should eat before or during the exercise. The objective is to achieve end-exercise blood glucose levels within the hypoglycemic and the hyperglycemic thresholds. The Italian research group responsible of it has applied for an international patent (not granted yet) submitted for the

algorithm and a simple device (prototype). They aim to find care and health services mainly (clinical research groups) to test new applications of the system or adapting it to specific needs. If you are interested in contacting this institution please do not hesitate to inform Gemma Pascual,

Convocatorias

CIBERDEM Mobility Programme

Starting in 2011, and co-financed by the EU FP7-People-2010-COFUND Programme, CIBERDEM is offering Marie Curie Fellowships through the new DIATRAN (DIAbetes Trans-national Research Advancement for INvestigators) mobility programme, aimed at providing worldwide outstanding researchers with unique career development opportunities. Application forms and more information at www.diatrain.ciberdem.org

FP7 Cooperation Calls available

KBBE. Food, Agriculture and Fisheries, and Biotechnologies. Objective: Nutrition, response to specific dietary needs of consumers, impact of lifestyles between others.

European Commission | Deadline: 15/11/2011 | Budget: EUR 304.57 million | Research topics added in sections like 'Fork to farm: food, health and well being'.

ICT. Information and Communication Technologies. Objective: Competitiveness of European industry, global leadership, application to societal challenges (ageing population, sustainable health and social care) and so on.

European Commission | Deadline: 17/01/2012 | Budget: EUR 787 million | Research topics classified in sections such as 'ICT for Health, Ageing Well, Inclusion and Governance'.

NMP. Nanosciences, nanotechnologies, materials and new production technologies. Objective in section health and safety: Nanomedicine and materials for health, safe use of nanotechnologies, between others.

European Commission | Deadline: 08/11/2011 (depending on the section) | Budget: EUR 501.87 million | Research topics included in sections like 'Nanosciences and Nanotechnologies'.

CIBERDEM has endorsed the European 'Charter & Code'

The European Charter for Researchers and Code of Conduct for the Recruitment of Researchers were adopted by the European Commission as a Recommendation to the Member States. The 'Charter & Code' address researchers as well as employers and funders in both the public and private sectors. The Charter provides a framework for the career management of researchers, while the Code promotes open and transparent recruitment and appraisal procedures. Together they are aimed at developing an attractive, open and sustainable European labour market for researchers.
